Methodology

The analysis in this report is based on results of a survey conducted from Friday, July 19th to Sunday, July 21st, 2024, among a sample of 780 Registered Voters, 18 years of age or older, living in The US. The survey was conducted IVR and an online panel to complete the survey. The survey is intended to represent the voting population in The US. Weights are applied for Gender, Race, Education and Past vote. Party ID is determined by asking which party each respondent most identifies with, as some states do not have voter registration by party.

Since the poll was partially completed online, a margin of error cannot be assigned to the poll, but a poll of this size would have a margin of error of +/- 3.5% at the 95% confidence level. Margins of error are higher in each subsample.

This poll was commissioned by and is the exclusive property of Mainstreet Research and FAU. Any reproduction, in whole or in part of this report or the data contained herein is expressly prohibited without written authorization by Mainstreet Research and FAU.
